

Wisconsin Labs that Analyze Arsenic and Lead in Soil

This is a subset of laboratories from the Wisconsin Department of Natural Resources (DNR) list of certified commercial laboratories. This subset list of laboratories was created in November 2002 by calling all Wisconsin laboratories on the DNR list that had lead and arsenic on their analyte lists, to verify that they can perform these analyses on soil samples. Phone numbers, addresses, analyte lists, and business status change over time, so please contact the lab and verify their mailing address and their ability to do the analyses you want prior to sending any samples. When asking about costs and when shipping your samples, specify that you need to know the concentration of arsenic to 5 ppm or less, and the concentration of lead to 50 ppm or less. The full DNR list of certified laboratories (which also includes laboratories in other states and is updated quarterly) can be obtained from the DNR at <http://www.dnr.state.wi.us/org/es/science/lc/search/> or by calling 608-267-7633.

APL Environmental
8222 W Calumet Rd
Milwaukee, WI 53223
414-355-5800

Badger Laboratories & Eng Co Inc.
501 W Bell St
Neenah, WI 54956
920-729-1100

Commonwealth Technology Inc
1230 Lange Ct
Baraboo, WI 53913
608-356-2760

Davy Laboratories
115 S 6th St
La Crosse, WI 54601
608-782-3130

En Chem, Inc.
1241 Bellevue St
Green Bay, WI 54302
920-469-2436

Environmental Task Force
College of Natural Resources
UW-SP
Stevens Point, WI 54481
715-346-3209

Mid-State Environmental Consulting
303A Edison St.
Mosinee, WI 54455
715-693-6850

Northern Lake Service, Inc.
400 N Lake ave
Crandon, WI 54520
715-478-2777

S-F Analytical Laboratories, Inc.
6125 W National Ave
Milwaukee, WI 53214
414-475-6700
